

List of most used commands

Clone repository of MSHD

```
git clone https://github.com/CaesarXVII/Model-Selection-in-High-Dimensions.git
```

GitHub routine

1) Always pull first to see the changes of the other collaborators:

```
git pull
```

2) Commit all your changes and leave a message :

```
git add -A && git commit -m "Some text to explain what you did"
```

3) Make your modifications available for everyone :

```
git push
```

Status (have you pulled, pushed or commit?)

```
git status
```

To eliminate the last commit (cancels step (2))

```
git reset --hard HEAD~1
```

History of previous commits in the repo

```
git log --oneline
```
